

CUSTOMER TESTIMONIALS

HAREFIELDS HOUSE, KINGS CROSS, ISLE OF ARRAN

"[Armitage] treated our new build project as if it was their own house that they were building. There is a lot of professional pride going on here".

"Struan and Rachel were wonderfully accommodating and attentive to all of our particular needs. They went out of their way to make what can be an extremely stressful period in ones life, into a painless and pleasurable experience".

"We opted for the Structural Insulated Panel Solutions (SIPS) kit building process for our new house and what a great decision that was. The insulating properties of this form of house construction is just phenomenal and coupled to our decision to go for Air Source Heat Pump technology and underfloor heating, we no longer have to worry too much about electricity bills".

"The house is just fantastic in every way. Struan and Rachel incorporated every detail and nuance that we had requested. The build quality inside and out, is absolutely stunning and even the exterior landscaping was completed with care and more than a little style".
