

CUSTOMER TESTIMONIALS SILVER FERN, WHITING BAY, ISLE OF ARRAN

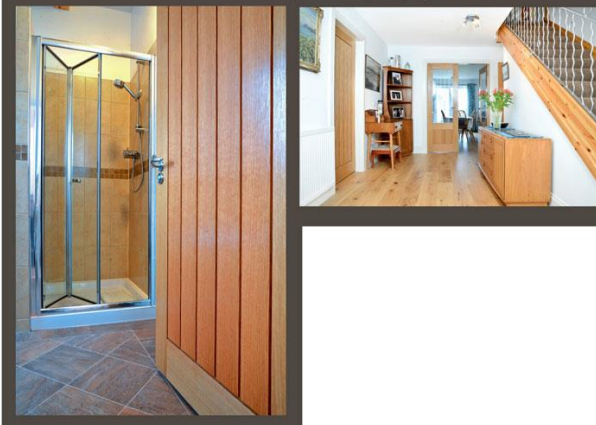

"We found buying a house from Armitage Groundworks to be a very straightforward and hassle free process. Dealing with a local business made it very easy to contact the principals, resolve queries and progress the purchase.

The house was well designed and a lot of thought had been put into layout and finishes, using local suppliers and businesses where possible.

The result was an exceptionally well insulated house with very low heating costs and a high standard of internal finish but with a traditional harled and slated exterior to blend in with established houses.

Moving in was made easier by the provision of a manual with all appliance details and a session with the heating engineer to find out how to run boiler/solar pipes. After sales service has been excellent with the few quite trivial snagging points which arose being rectified promptly."
